To whom it may concern:

I am very enthused to provide a letter of recommendation for Michelle Konrardy. She has been the educator of my Chemistry course. Not only that, she has been one of the top educators in my high school career.

Mrs. Konrardy has truly prepared me for my college education. She may have pushed me to my limits at times but she developed me into the student that I am today. Without the guidance of Mrs. Konrardy as an educator, I don't feel I would have truly been prepared for college. Mrs. Konrardy made it clear to me that I had to study the concepts and do my homework or I would fail. But, she taught something that was more important than studying and doing homework. She taught me what Chemistry truly meant. She told our class that "CHEM IS TRY!" She broke Chemistry into three separate words on our first day of class that made us see that anyone could do Chemistry as long as they tried. She would award the students that always tried their homework and tried to understand even if they weren't exactly good at Chemistry. I am not saying that those students received unearned grades either. They had to work like the rest of us if they truly desired to pass Chemistry. Mrs. Konrardy showed faithfulness in her students from day one and reassured me that I could do Chemistry despite how hard past students told me it was.

Chemistry taught me one vital key to my future. Mrs. Konrardy's class showed me that I loved the science of Chemistry. Her class helped me pursue my major in Biochemistry. Mrs. Konrardy is an educator that I have always been able to sit down and have a conversation with. She is easy to talk to and has always been willing to stay after school or come a little early if I needed help with something. She always tried to remain flexible if I missed a test or quiz so I could make it up in a timely fashion. One of the most important conversations I have ever had was with Mrs. Konrardy. It was the day I sat down and talked with her about Biochemistry. I asked her about the science and figured out how it would help me with my future profession of becoming a doctor. She was willing to sit down and listen to my questions and answer them efficiently and happily. She helped me pursue my future. I don't feel that I would be pursuing Biochemistry if it wasn't for the conversation that I had with Michelle Konrardy. I wouldn't have known enough about the science to look into it and find how it relates to health care.

Michelle Konrardy is more than a standard educator. She is an educator that pushes you past your limits so you can develop into the best student that you can be. She is willing to listen and help you. She is willing to work with you on any situation. Michelle Konrardy is the educator that has inspired. She is an excellent educator and I enthusiastically recommend her for any endeavors that she encounters.

Sincerely,

Christy Ralston

West Carroll High School Student
