To whom it may concern:

As a special education teacher at West Carroll High School, I had the opportunity to work with Ms. Konrardy as a co-teacher in both Earth Science and Environmental Science classes. I found her to be firm yet fair with the students in our classes. She was very knowledgeable about the subject matter and often used many different sources to embellish her lessons.

With the special education students in our classes, she did an excellent job of differentiating instruction, adapting assignments and tests, and allowing for extended time when needed. Ms. Konrardy was always quick to recognize and reward effort in our classes.

It is without hesitation that I recommend Ms. Konrardy for a teaching position in your school district. I am certain she will handle any teaching position in a positive, professional manner, and will be an excellent representative of your school and district.

Feel free to contact me if you have any questions.

Sincerely,

A handwritten signature in cursive script that reads "Michael B. Spencer".
